

SUMMARY

The present invention relates to the technical mineral matter suspension sector, and, 5 before and/or after drying, their applications in the fields of paper, paint and, after drying, plastics.

It also relates to the use of a copolymer having at least one alkoxy or hydroxy 10 polyalkylene glycol function grafted onto at least one ethylenically unsaturated monomer, as agent whose role is to enhance the gloss of the final product and, in particular, the gloss of the sheet of paper, irrespective of the viewing angle.
